Experience

Lead Member Of Technical Staff

Salesforce

Feb 2021 - Present (4 months +)

Technical Lead of the Coolan team within Salesforce, building and operating a server hardware health/analytics platform that is responsible for the lifecycle of hardware within its service lifetime; orchestrating an automated alerting framework to provide data center engineers with the actionable information required to effect rapid turnaround on issue remediation.

Senior Member Of Technical Staff

Salesforce

Aug 2018 - Feb 2021 (2 years 7 months)

Technical Lead on multiple cross-team functional projects, including a complete rearchitecture of our hardware analysis platform.

Member Of Technical Staff

Salesforce

Apr 2017 - Aug 2018 (1 year 5 months)

Built a scalable Kafka-based data pipeline for delivering server telemetry data and unstructured log files into a distributed parser service.

Led the effort to build several new integrations and hardware error detection methods, delivering actionable insights on infrastructure health.

Associate Member Of Technical Staff

Salesforce

Aug 2016 - Apr 2017 (9 months)

Backend Engineering Intern

Coolan

Jun 2015 - Sep 2015 (4 months)

Responsible for building out and delivering several key features for our pilot customers

Education

University of Chicago

Bachelor's Degree, Computer Science

2012 - 2016

Skills

Apache Kafka • Java • Distributed Systems • Infrastructure • Elasticsearch • Amazon Web Services (AWS) • Terraform • ANTLR • Kubernetes • Spring Framework

Honors & Awards

President's Award - Salesforce

Mar 2021

Granted to the top 1% of engineering organization members each year, as selected by the office of the President and Chief Engineering Officer.
